<b>Description</b>	Trilobular thread-rolling screw with extra wide spacing between 45° profile threads and a single lead thread that extends from the blunt point. The head is countersunk with a hexalobular recess for driving the crew
<b>Applications/Advantages</b>	Thermoplastics, engineering resins and certain thermosets. Sharper thread profile increases holding strength while reducing material displacement. Drive and strip torques are higher, reducing the need for inserts or reinforcing clips.
<b>Material</b>	<i>Steel</i> AISI 1022 steel
<b>Heat Treatment</b>	Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.
<b>Case Hardness</b>	HV 450 minimum
<b>Case Depth</b>	<i>M2 thru M3.5 diameters:</i> 0.05 - 0.18 mm <i>M4 &amp; M5 diameters:</i> 0.10 - 0.25 mm
<b>Core Hardness (after tempering)</b>	HV 250 - 380
<b>Plating</b>	Screws have a RoHS-compliant zinc finish.
