		Thru 3/4"	Over 3/4" to 1.5" incl.	Over 1.5"
#12 and 1/4"	+0, -.03"	+0, -.05"	+0, -.06"	

**NOTE:** There is no single standard for Modified Truss self-drilling screws. These values are offered as a guide; deviations from these specifications may occur.

<b>Description</b>	A steel fastener with an extra wide head, twinfast thread and self drilling point. The head is an integrally formed round washer with a low rounded top that is approximately 75% the diameter of the washer. The recess may be six-lobed or square.
<b>Applications/ Advantages</b>	Common usage is to attach wire or metal lathe to metal studs of a thickness between 12 - 20 gauge. The head design offers low clearance and an extra large bearing surface.
<b>Material</b>	AISI 1016 - 1022 or equivalent steel.
<b>Heat Treatment</b>	Screws shall be quenched in liquid and then tempered by reheating to 625°F minimum.
<b>Surface Hardness</b>	Rockwell C 52 - 58
<b>Case Depth</b>	#6 diameter: .002 - .007 #8 thru #12 diameters: .004 - .009 1/4" diameter: .005 - .011
<b>Core Hardness (after tempering)</b>	Rockwell C 32 - 40
<b>Plating</b>	Screws are commonly available in zinc or black phosphate coatings. See Appendix-A for details.
